MODULETEK : DAC-QSFP-2SFP-50G-P-xxAWG-aa.aaM-D1C1B

QSFP to 2SFP 50G Passive Copper Cable Assembly

Overview

ModuleTek's QSFP to 2SFP 50G passive cable is the preferred solution for short-range data transmission, it has the characteristics of low power consumption, good stability and high cost performance. The four channels of the QSFP side close two of the channels to realize data transmission between the QSFP two ports and two 25G SFP ports, providing a low-cost solution for data transmission services within and between data center racks. The product complies with the QSFP28 MSA and SFP28 MSA standards.

Product Features

- QSFP End: Compliant with QSFP28 MSA specifications
- SFP End: Compliant with SFP28 MSA specifications
- 2 independent duplex channels operating at 25Gbps
- AC coupled inputs and outputs
- 100 Ohm differential impedance
- All-metal housing for superior EMI performance
- Single power supply 3.3V, low power consumption
- RoHS Compliant
- Operating temperature range (Case Temperature) :
Commercial Level : 0°C to 70°C

Applications

Serial Data Transmission

Storage

Fiber Channel

Ordering Information

Part Number	Product ID	Description	Gauge	Length
DAC-QSFP-2SFP-50G-P-30AWG-aa.aaM-D1C1B	M205804	QSFP to 2 SFP 50G Passive Direct Attach Copper Cable Assembly, aa.aa \leq 2	30AWG	\leq 2m
DAC-QSFP-2SFP-50G-P-28AWG-aa.aaM-D1C1B	M205805	QSFP to 2 SFP 50G Passive Direct Attach Copper Cable Assembly, aa.aa \leq 3	28AWG	\leq 3m
DAC-QSFP-2SFP-50G-P-26AWG-aa.aaM-D1C1B	M205806	QSFP to 2 SFP 50G Passive Direct Attach Copper Cable Assembly, aa.aa \leq 5	26AWG	\leq 5m

Note:

1. "P" indicates passive cable
2. "aa.aa" indicates the cable length in meters.
3. The product with write protection.
4. The wire diameter of the products in the above list is the default value under different lengths. We can also provide other wire products to customers with special requirements.
5. Product ID is the short order number of our product standard model.

35	GND	Ground	5
36	Tx1p	Transmitter Non-Inverted Data Input, LAN1	
37	Tx1n	Transmitter Inverted Data Input, LAN1	
38	GND	Ground	5

Notes:

1. ModSelL is the input pin. The module responds to 2-wire serial communication commands when it is held low by the host. ModSelL allows multiple QSFP modules to be used on a single 2-wire interface bus. If ModSelL is High, the module will not respond to any 2-wire interface communication from the host. ModSelL has internal pull-up resistors in the module
2. The module restart pin, when the low level on the ResetL pin lasts longer than the minimum pulse length, resets the module and restores all user modules to their default state. When performing reset device, the host should ignore all status bits. Until the module reset interrupt is completed, please note that during hot plugging, the module will issue this information to complete the reset interrupt without resetting
3. This pin is active high, indicating that the module is running under a low power module. The signal has no effect on the functionality of this product.
4. IntL is the output pin, which is the open collector output and must be pulled up to Vcc with a 4.7kΩ-10kΩ resistor on the motherboard. When it is low, it indicates that the module may malfunction. The host uses a 2-wire serial interface to identify the interrupt source
5. Circuit ground is internally isolated from chassis ground.

SFP Pin Assignment

PIN #	Symbol	Description	Remarks
1	V _{EET}	Transmitter ground (common with receiver ground)	1
2	TX_FAULT	Transmitter failure alarm, not used	
3	TX_DISABLE	The signal turns off the module transmitter when it is high or open, not used.	
4	SDA	Data line for serial ID	2
5	SCL	Clock line for serial ID	2
6	MOD_ABS	Module Absent. Grounded within the module	2
7	RS0	No connection required	
8	LOS	Loss of Signal indication. Logic 0 indicates normal operation	
9	RS1	No connection required	
10	V _{EER}	Receiver ground (common with transmitter ground)	1
11	V _{EER}	Receiver ground (common with transmitter ground)	1
12	RD-	Receiver Inverted DATA out. AC coupled	
13	RD+	Receiver Non-inverted DATA out. AC coupled	
14	V _{EER}	Receiver ground (common with transmitter ground)	1
15	V _{CCR}	Receiver power supply	
16	V _{CCT}	Transmitter power supply	
17	V _{EET}	Transmitter ground (common with receiver ground)	1
18	TD+	Transmitter Non-Inverted DATA in. AC coupled	
19	TD-	Transmitter Inverted DATA in. AC coupled	
20	V _{EET}	Transmitter ground (common with receiver ground)	1

Notes:

1. Circuit ground is isolated from chassis ground
2. Should Be pulled up with 4.7k - 10k ohm on host board to a voltage between 2V and 3.6V
